

Neil Patterson

SOFTWARE ENGINEERING MANAGER

Hartford, Connecticut, USA

+1 860 268 7961 | nmpdesign@gmail.com | neilmpatterson | neilmpatterson

Profile

Software engineering manager with 20+ years building scalable web applications and developing engineers through coaching, transparent communication, and meaningful ownership. Combines hands-on Ruby on Rails and JavaScript architecture with cross-functional Product and Engineering leadership, reliability improvements, and sustainable delivery practices.

Core Competencies

Engineering Leadership	Developmental coaching, mentorship, onboarding, stakeholder alignment, Agile leadership, and cross-functional execution
Architecture and Reliability	System design, scalable SaaS applications, maintainability, testing strategy, CI/CD, and deployment workflows
Application Development	Ruby, Rails, JavaScript, React, Next.js, PHP, accessibility, and responsive design
Data and Platforms	PostgreSQL, MongoDB, MySQL, Docker, and GCP
Product and Design	EdTech, user-centered design, client-focused problem solving, and Product/Engineering collaboration

Professional Experience

Finalsite

SOFTWARE ENGINEERING MANAGER

2021–Present

- Lead an engineering team delivering reliable, scalable web applications in a fast-paced SaaS environment.
- Reduced the bug backlog by 25%, increasing production stability and release confidence through stronger testing and deployment workflows.
- Built onboarding systems that enabled engineers to contribute production code within their first week.
- Coach engineers through problem solving, code quality, test coverage, career development, and broader team contribution.
- Collaborate with Product to translate business goals into technical execution and system design.

Finalsite

SENIOR WEB DEVELOPER

2010–2021

- Served as a technical lead for system architecture, scalability, and engineering best practices.
- Built and maintained production applications with Rails, JavaScript, PostgreSQL, and MongoDB.
- Helped the engineering organization transition from ColdFusion to Ruby on Rails, learning the stack quickly and supporting colleagues through the change.
- Improved user experience through accessibility and responsive-design initiatives while mentoring developers across teams.

ORLive.com

WEB DEVELOPER

2005–2010

- Built medical CME learning management systems paired with medical-procedure broadcasts.
- Created a patient portal connecting prospective surgery patients with surgeons and hospitals, supporting monetization of broadcast marketing.

Timeframe, Inc.

GRAPHIC DESIGNER / WEB DEVELOPER

2001–2005

- Modernized a Lasso/FileMaker Pro customer portal to PHP/MySQL and automated online ordering, contributing to increased sales.
- Combined visual design, illustration, and web development in client-facing digital work.

Education

Keene State College

Keene, New Hampshire

BACHELOR OF SCIENCE IN GRAPHIC DESIGN

2001

Certification

Scrum Alliance certification. Exact credential not specified; expired June 2026, with renewal planned.
